

PROJECT DESCRIPTION

Modifications to existing development at a City-owned park located at 8820 Wiley Post Avenue. Specifically, the improvements include:

- a) The addition of approximately 375 square feet to an existing 337 square foot storage area. Upon implementation of the project, the additional square footage will include additional handicapped-accessible bathrooms and additional storage space resulting in a structure of 712 square feet, and;
- b) Minor modification to an existing snack bar area, which will include the formal conversion of the snack bar area to storage space. This space will function as a distribution area where sports equipment will be given to underprivileged children.
